## PIAO I TEA POT

The Piao I teapot is made in Taiwan by a specialised tea utensil manufacturer. Piao I teapots have received 6 international honours for excellence and design. The award-winning design allows tea to be brewed quickly, conveniently and avoids over brewing. A perfect combination of teapot, serving pitcher, drinking cup and filter.

Piao I, literally meaning "drifting" and "pleasure," the Piao I teapot is the perfect accessory for high quality tea. They are environmentally friendly, sanitary, dishwasher safe, transparent and resistant to fogging.

Add your tea leaves to the inner pot; we recommend 2 heaped tablespoons for the 500ml teapot. Add water at the correct temperature and put the lid on to cover. Allow tea to brew (infuse for approximately 1½ minutes) then press the button on the cover to let the tea filter and flow out. When the button on the lid is pushed this opens the ball valve on the bottom of the inner cup, allowing the brewed tea to drain into the lower container.

The leaves are no longer in contact with the water, so the tea is not over brewed. The tea and tea leaves will then stay separate until you want to start another infusion by adding more water. Using 2 heaped tablespoons and this simplified Gungfu approach you can brew the leaves 4 times or more. The outer pot can be used as a serving pot or as a drinking cup whilst you can continue to brew tea in the inner pot; the ball device avoids tea/liquid leaking, unless the button on the cover is pushed then it will flow out!

The Piao I teapot is so easy to use that anyone can brew a good cup of tea with it. With a simple press of the button, the brewed tea flows into the jug and is filtered automatically; tea leaves are separated from the water to avoid over steeping. The Piao I is also perfect for brewing coffee.

In our range we stock-

Glass Piao I Teapot 500ml

Plastic Piao I Teapot 500ml

Glass Piao I Teapot 1000ml

Travel Buddy 580ml
